

EUROWASH

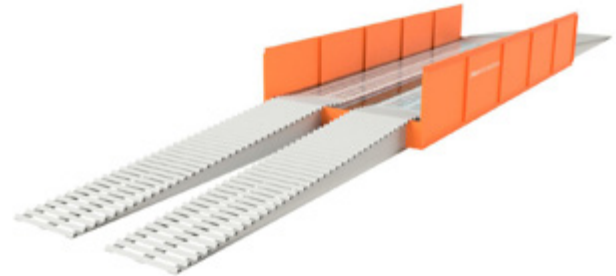

CONSTRUCTION RANGE

EUROWASH DRY RUMBLE DECK

The dry rumble grid shakes off dirt from the tyres and chassis, Whilst driving over. It is a very simple and easy to use cleaning system.

Length 10m giving 2 revolutions of the wheels.

EUROWASH DRIVE THROUGH BATH

Requires no power, just add water. Vehicles simply drive through the bath, which cleans the tyres, wheels and chassis.

Length of the bath 10m plus optional 6m long ramps.

EUROWASH

Powered spray unit with water Recycling. 6 inch pipework for High pressure delivery. The wash unit is placed into the ground with debris collected in the lagoon for easy removal. Systems can be electric powered or supplied with their own diesel pump.

Length 6m for 2 full wheel revolutions.

EUROWASH ADVANCED

Excellent washing and re-cycling properties. There are 6 weirs in all to remove dirt and debris from the system. Either into a skip or by suction from the 6 butterfly valves.

The whole system is automatic from the driver entering the sensors to the water top up.

Length 6m for 2 wheel revolutions.

Re-cycled water tanks a massive 68,000 litres.

EUROWASH COMPACT

Fully portable unit ideal for tight spaces. Auto Start/Stop spray pump. Complete with Rumble Grid Ramps. Can also be installed into the floor.

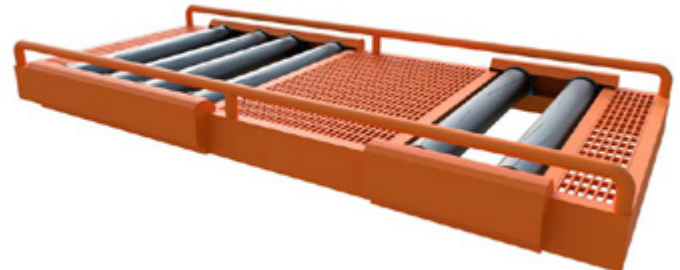

Modular design allows extensions from 2.5m to 7.5m long (without ramps).

Mains or Generator powered.
